Summary Description of PDF Reports Available

A variety of report types can be generated (depending on if available for that test).

Report Title	Description
Assessor Scores Report	This PDF report produces a simple and easy to read table of a candidate's test scores.
Assessor Profile Chart	This PDF report produces a graphical display of each candidates test scores.
Candidates Feedback Report	This PDF report is designed specifically for candidates' that provides them with a summary feedback of their performance on a test or exercise. This report is the only one permissible to be given to candidates for their own reference.
Manager Feedback Report	This PDF report is designed specifically for managers' that gives a summary of how a candidate has performed on a test or exercise. This report is solely for the use of managers who might not necessarily be trained in the use of psychometric materials.
Interview Prompt Form	<p>This PDF generates bespoke questions for the candidate based on their responses to a Personality Questionnaire. These questions and probing interview questions can then be used at interview to allow you to gather behavioural evidence of the Personality Questionnaire findings.</p> <p>The report comes in two variations based on the training of the interviewer:</p> <ul style="list-style-type: none"> • For Managers: The form provides guidance on how to score the interview on an easy-to-score rating scale based on the behavioural evidence gathered. This form is <u>designed for those who are not necessarily trained</u> in the use of psychometric material. • For Assessors: The form provides guidance on how to grade the interview on an A-D scale based on the Personality Questionnaire findings and the behavioural evidence gathered. This form is <u>designed for those who are trained</u> in the use of psychometric material.

Export Data

Exporting data in a CSV (Comma Separated Values) format will produce all the candidates scores in one file that can be viewed as a spreadsheet using for example MS Excel, listing the results as one row per candidate. The greatest benefit of having the test scores in a spreadsheet format is that you can easily analyse candidates' scores with other data you may have. This could be comparing candidate's scores with each other or against other internal data you have.
